

WEEK TWO – SLIPPERY FINGERS 4.9km

Start where you started on week one. Please give way to less experienced skiers coming down the first hill by the technical building.

Continue through Piccadilly Circus Junction onto Pine Flats. After going down and up the “snowman hill” go another 100m or so and turn right onto the “Lit Loop”. This less traveled trail is a shortcut to Fingers. It also helps one avoid the first “big downhill” on Fingers which some may find intimidating.

When you get to Fingers stay left. The Fingers Trail is ONE WAY (heading west). Follow the Fingers up and down and around and around for about 3 1/2 k until you come to the end at Thumbs-up Junction.

At Thumbs Up make your way onto the Iceman cut off and to the Yeti Junction. This is an even and consistent trail that is usually quiet; a good quiet place to practice your one-skate or double poling techniques. If you don't know what the heck I'm talking about, call Carolyn for a lesson!

At the Yeti Junction keep left, and then right to follow the Greenway Corridor past the gravel pit back to the lodge.

If in doubt at an intersection, watch for the blue V-boards on the right to help guide the way! Thanks to our volunteer course set up crew who are out there every week making sure your experience can be as safe and enjoyable as possible!
