**Athlete Representative Report
Liam Sinclair**

A summary of the Athlete Representative position

The Athlete Representative position is a new addition to the board this year, as a non-voting position held by an older, mature athlete who is a member of the racing programs. The aim of the position is to provide a voice for the athletes at the club to the board and be able to provide athletes with insights on developments occurring at the board level. The athlete representative attends board meetings to understand the matters being discussed and actions being taken by the board and has discussions with the athletes about matters that will affect them, as well as things the athletes feel are important and should be brought to the board's attention.

The impact of the Athlete Representative this season

Starting in April, when the position was first filled, I held a meeting with the racing programs athletes aged 15 and up to get a sense on how the previous on snow season had gone, as well as ask some questions that other board members had. The answers were then presented to the relevant board members and an overall report was compiled and presented to the board.

As the athlete representative, I was also able to be a link between the athletes and the board to encourage athletes and parents in the programs to show their support for the paved trails by.

What does next year look like?

It is a shared vision between the board and myself to have the Athlete Representative selected in some fashion by the athletes each year. Sometime after the AGM, the next Athlete Representative will be elected for the upcoming year. As the outgoing Athlete Representative, I can aid in the transition to the next Athlete Representative and help them get acquainted with the position.

It has been an honour to hold this position over the last seven months, and I look forward to seeing it continue to grow in the coming years.

Sincerely,

Liam Sinclair
Athlete Representative
